SUMMARY

Entry-level QA engineer with two internships automating web and API tests in Playwright and Python. Cut a regression suite's run time from 3 hours to 25 minutes and caught 30+ release-blocking bugs before production.

EXPERIENCE

Lumen Analytics May 2025 - Dec 2025
QA Automation Intern *Columbus, OH*

- Automated 140 manual regression cases in Playwright and TypeScript, cutting the release regression run from 3 hours to 25 minutes
- Ran the suite in parallel on GitHub Actions for every pull request, catching 34 release-blocking bugs before production
- Built API contract tests in pytest for 18 REST endpoints, flagging 9 undocumented breaking changes
- Reduced flaky test failures from 12% to 3% of runs by replacing fixed sleeps with explicit waits

Harborline Insurance Jun 2024 - Aug 2024
Software Testing Intern *Dayton, OH*

- Executed 300+ manual test cases for a claims portal release and logged 52 defects in Jira with clear repro steps
- Supported user acceptance testing for 2 releases by writing test plans with the product owner

PROJECTS

Load test toolkit (capstone)

- Built k6 load tests for a student-run course registration app and found a database lock that capped it at 200 users

EDUCATION

The Ohio State University Aug 2021 - Dec 2025
B.S. Computer Science and Engineering · GPA 3.6/4.0 · Relevant Coursework: Software Testing, Software Engineering, Databases, Operating Systems *Columbus, OH*

SKILLS

Testing: Playwright, pytest, Selenium, Postman, k6, Test plans, Regression testing
Languages & Tools: TypeScript, Python, SQL, GitHub Actions, Docker, Jira, TestRail

CERTIFICATIONS

ISTQB Certified Tester Foundation Level (CTFL)
